Dear Owner,

The purpose of this Medication Logbook is to serve as a record of each and every medication (whether homeopathic or treatment) given to the horse. The Logbook will enable the FEI to have a thorough check of medications to the horse. This information may be required by the FEI in the case of an alleged violation of FEI Regulations.

This booklet must always remain with the horse and each medication administered must be entered in the Logbook without delay.

FEI Veterinary Department

Medication Record

This information is compulsory for horses which have been administered medication both in and out of competition. It is particularly important to keep clear records of any treatment which includes an active substance that is currently on the FEI Prohibited Substances List. For further information on this List, please consult www.fei.org

Date	Place	Active substance, product name, dosage and batch number	Person Responsible	Treating Veterinarian (where applicable)
